

ProvaTHERMO.com

Optimise your road salting and improve your winter maintenance with our mobile solution

Reduce costs

Reduce your salt and brine consumption thanks to our unique algorithm that considers road conditions, pavement condition as well as current and future weather forecasts.

Increased efficiency

Visualise all the parameters you need to make decisions. With real-time information available to multiple users, you can make decisions quickly and easily.

Measurement mapping

View all geotagged information on road and weather conditions directly on your screen. Look at the planned routes with salt spreading forecast, then compare them with the work carried out (if coupled with ProVOIRIE).

Manufacturer-independent solution

Our forecasts apply to spreaders, briners and combined machines, whether mounted or towed. Our forecast is independent of the manufacturer.
